

Pewaukee River Partners, Friends and Guests, As you may recall from previous emails the Partnership purchased the plants for our annual sale in early February. Since then we have had restrictions place on how we would normally have held the sale. I have contacted the police department and we will be allowed to sell plants that have been ordered on our early order form. We will have preorders that have been submitted by the deadline available for pickup "carry out" style. There will be no plant stand for people to pick out plants and no sales unless I have received their preorder. We have also been asked to move to the parking lot at Koepp Park to make it easier to setup the drive through pickup. We have received permission for the use from the Park and Rec Department.

If you were planning on purchasing plants at the sale or know of people that might be interested you will have to use the early order form. If you need one please email me and I will send one out. On the form if you control/click on the common name of the plant you will be taken to that specific plant on the Agrecol website. There you will see a photo of the plant as well as information on size and sunlight/soil requirements. Please remember this form must be returned to me by April 17th.

Thank you for your support in this trying time, Charlie
